

Project Initialization and Planning Phase

Date	February 15 2026
Team ID	LTVIP2026TMIDS50820
Project Name	Prosperity Prognosticator :Machine Learning for Startup Success prediction
Maximum Marks	3 Marks

Define Problem Statements(Customer Problem Statement Template):

Startups are companies started by an individual or a small group of people based on a unique business idea. Most of the startups face high failure rates whereas few startups are very successful such as Facebook, Uber, and Snapchat etc. On average 90% of startups fail to succeed in their respective field of business. This work proposes a predictive method to determine the outcome of start-ups based on several key factors that contribute to the success such as Acquisitions, Investments, Total rounds of funding etc.

Reference: [Template link](#) **Example:**

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
------------------------	------	---------------	-----	---------	---------------------

PS-1	An Entrepreneur	Predict the Startup Success	It is difficult to estimate the success of startup	There is no sustainable growth	Panic and dissatisfied
------	-----------------	-----------------------------	----------------------------------------------------	--------------------------------	------------------------
